Item

private String slotName;  
private int quantity = 5;  
public Item (slotName, ...){  
quantity = 5;

both will initialize  
quantity to 5

BigDecimal money  
money would be current money fed in  
money = money.add(moneyToAdd);  
money = money.subtract(purchasedPrice);  
if (money.compareTo(purchasePrice) >= 0) // then we have enough money  
if (money.compareTo(purchasePrice) < 0) { // not enough money to buy!!
